

CX-100 CROSS LINKING AGENT-ACTIVATOR

For ClearShield Anti-Graffiti or for extra chemical resistance on all other ClearShield Grades.

CLEARSHIELD ANTI-GRAFFITI

CX-100 is designed to be added directly to Anti-Graffiti Clear with a ratio of activator to coating of 33:1 (30ml/litre). Mix well after addition.

Once activated the solution has a pot life of 4-6 hours and will gel after that time. Only activate the quantity you will use. Be certain to quickly clean all equipment that comes in contact with the solution.

Once mixed the Anti-Graffiti/Activator solution cannot be reactivated.

ALL OTHER CLEARSHIELD GRADES

CX-100 is designed to be added directly to ClearShield with a ratio of activator to coating of 100:1 (10ml/litre). Mix well after addition.

Once activated the solution has an activated pot life of 8 hours. However after 24 hours any remaining solution can be reactivated up to 2 more times. It is recommended that any remaining solution be disposed of after 3 activations.
